SUPPORT

Customer support is incredibly important to the success of our customers and the TPG Support team knows that. This team is available for you whenever you may need, and is willing to go above and beyond in order to make sure your system is operating correctly.

DEVELOPMENT

Our development team's expert knowledge and experience make Picas the strongest, most robust and complete software package in the horticulture industry. They are committed to making sure Picas works for all aspects of your operation, day in and day out.

CONSULTING

From Horticulture degrees, to years of working with Picas in a greenhouse, to then deploying Picas and training growers across the world, our consulting team is very experienced. They understand our growers better than anyone else, and their industry and software knowledge make them experts in multiple capacities.

IT

Our IT team is exceptionally educated, and impressively eager to remain on the cutting edge of the best and most innovative practices for all things technology. They will take care of all your technology needs—making sure your database and network are secure, efficient, and reliable—so you you can focus on running your business and doing what you love.
